PRESS RELEASE

Aluminum Foil Container Manufacturers Association Welcomes Kibar Americas as Newest Member

August 14, 2026 — All Foils, Inc., a Cleveland-area distributor, processor and converter of aluminum foil, today welcomed Kibar Americas as the newest member of the Aluminum Foil Container Manufacturers Association (AFCMA), the trade association representing manufacturers and suppliers across the aluminum foil container industry.

Kibar Americas is the wholly owned U.S. subsidiary of Assan Alüminyum, one of the world's leading manufacturers of flat-rolled aluminum products. The company operates an aluminum foil manufacturing facility in Fairmont, West Virginia, producing high-quality aluminum coils for the consumer durables, HVAC, building and construction, distribution and automotive sectors, with a broad range of alloys, tempers, gauges, widths and texturants supporting the semi-rigid container market.

As a fellow AFCMA member and a Cleveland-area converter since 1980, All Foils supplies precision aluminum foil and sheet to customers across packaging, foodservice, HVAC, aerospace, medical and industrial applications, with in-house slitting, sheeting, laminating, coating and flexographic printing capabilities and ISO 9001:2015-certified quality management on every order. All Foils views Kibar Americas' addition to AFCMA as a welcome expansion of domestic aluminum coil capacity for the semi-rigid container market it and its fellow members serve.

With the addition of Kibar Americas, AFCMA's membership now spans converters, container manufacturers and material suppliers including All Foils, Inc., Handi-Foil, Wyda Packaging USA, D&W Fine Pack, Durable Packaging, i2RPL, Penny Plate, Reynolds Consumer Products, Shah Foil, Trinidad Benham, Granges and Novelis.

About All Foils

All Foils is a Cleveland-area distributor, processor and converter of aluminum foil, serving domestic and international customers with standard and custom gauges, alloys and widths since 1980. In-house slitting and converting meet exact specs on every order, large or small, backed by ISO 9001:2015 certification.

About AFCMA

The Aluminum Foil Container Manufacturers Association (AFCMA) represents manufacturers of aluminum foil containers and the suppliers that serve them. The association promotes aluminum foil containers as the packaging material of choice for retailers, foodservice and baking operations, packer processors and packaging engineers, citing their versatility, low cost, convenience and full recyclability.
