

Job Description

All Foils is a growing distributor and processor of light gauge metal products based in Strongsville OH. We coat, slit, clean and sheet aluminum, stainless steel and copper foil products. To deliver the global solutions our customers require, we count on exceptionally talented, bright, and committed people. Currently, we're seeking a Plant Manager to lead and direct the production, maintenance, and shipping/receiving functions. This professional multitasker will direct the coordination of all manufacturing departments' functions to ensure compliance with company objectives, quality systems, and customer satisfaction. The ideal candidate will be exceptionally detail oriented and able to lead a team, serving as a liaison between upper management and the functions of the plant. You must be dedicated to achieving operational excellence with a genuine interest in helping our company succeed.

Objectives of this Role

- Ideate and implement strategic visions to create and improve production, quality, and labor utilization throughout the facility
- Provide the leadership needed to ensure effective utilization of plant personnel and equipment
- Collaborate with functional departments in the implementation of all continuous improvement activities
- Investigate and implement innovative methods of manufacturing processes to reduce costs and improve quality of the product

Daily and Monthly Responsibilities

- Plan, direct, and coordinate all manufacturing operations of production, machinery, processing, and packaging departments
- Run the daily MDI (Manage for Daily Improvement) meetings and scheduling meetings to insure we are delivering on our daily internal and external metrics
- Track the daily, weekly and monthly manufacturing results and deliver those results in the monthly managers meeting

- Budget and manage manufacturing cost structures by developing and maintaining operational expenses within budget allowance, and investigate cost-reduction measures
- Create documentation protocols and ensure that all operations records are properly maintained and reviewed
- Manage our overall plant OGSM process to insure key projects are being delivered on time and on budget

Skills and Qualifications

- BA or BS in operations management, business, engineering or related field
- 7+ years plant operations or engineering experience
- Proven supervisory skills and demonstrated leadership skills
- Demonstrated understanding of Lean Manufacturing concepts such as 5S and Six Sigma.
