All Foils Adds a New High-Speed Slitter.

The nation's leading foil distributor and converter announces expanded production capabilities with the addition of its tenth high-speed slitting & rewinding machine.

For immediate release.

For over 40 years, All Foils has been providing customers around the world with light-gauge metal foil products and converting services.

Today, All Foils announced that its expanding its processing capabilities by adding a new high-speed slitter/rewinder. Manufactured in Germany and shipped to the Cleveland-based business, the state-of-the-art piece of equipment is All Foils tenth slitting and rewinding machine.

Combining this new machine with All Foils existing rotary sheer, giant sheer and four high-tech coaters, All Foils is well equipped to perform various foil converting and processing services all in its 150,000 sq.ft. facility.

With its latest investment in manufacturing equipment, All Foils has reduced its slitting and rewinding lead times to an industry-best. Its capability to offer faster processing times and accommodate larger order quantities undoubtedly secures All Foils top-spot as the nation's leading foil distributor and converter.

###

All Foils leads the industry in light-gauge metal foil solutions for a diverse range of industries and end uses. Located just south of Cleveland, Ohio, the domestic-based distributor and converter offers various specialized products and services all at competitive pricing.

Building on almost 50 years of experience, All Foils wealth of knowledge, extensive inventory and impeccable quality are what separate it from the competition. From a simple rewind to a custom multilayer construction, no job is too big or too small for All Foils!
